TAYRONA
CAPITAL FINANCIAL GROUP

Tayrona is moving... fast.

This issue of **Tayrona News** captures the momentum shaping our platform today and positioning us for what's next.

Inside this issue:

- **Tayrona Today:** A clear, simplified view of the group, now organized into three operating divisions: Tayrona Maisons, Global Financing & Development, and Tayrona Ventures.
- **Tayrona Maisons - Portfolio Spotlight:** A portfolio snapshot of Qvinto, Ameria Riva, Tayrona Cacao, Rudis Sylva, and Sagana, outlining each Maison's purpose, origin, and vertically integrated model.
- **Global Financing & Development:** An overview of how we structure, finance, and deliver socio-economic initiatives under defined governance, compliance, and delivery pathways.
- **Tayrona Ventures Updates:** Momentum in Magnesium Oxide (MgO) and our work to reshape construction materials. We're also progressing toward evaluating a first Canadian mine opportunity in partnership with the First Nations.
- **Nation Building in Action - Country Spotlights:** Spotlights across South America and Africa, showing how we deliver as Singularity Curators and trusted partners to our counterparties.

Tayrona Today: A Period Defined by Strategic Alliances and Accelerated Growth

The first quarter of 2026 marks an inflection point for Tayrona Capital. We are a global, regulated platform sharpening our focus, modernizing our operating model, and building capabilities designed for long-horizon value creation.

In this newsletter, we share how Tayrona is organizing execution across the group through three operating divisions.

Tayrona Maisons:

Curated, vertically integrated brands that elevate a country's distinctive resources, craft, and heritage into world-class products and experiences.

Global Financing & Development:

A platform to structure, finance, and deliver large-scale projects that strengthen local capacity, generate jobs, and support long-term value creation.

Tayrona Ventures:

A catalyst for strategic opportunities, partnerships, and new initiatives that expand the Tayrona ecosystem.

TAYRONA
CAPITAL FINANCIAL GROUP

Across these divisions, our mission is consistent. We are **Architects of Prosperity**, and we aim to serve as a trusted country partner to governments, institutions, and qualified counterparties.

We describe our role as **Singularity Curators** with a clear purpose to elevate the world's rarest gifts into icons of high cultural capital. This requires the sensitivity to identify what is singular at the local source and the capacity to bring it into the most demanding global circles, while honoring the communities that safeguard these treasures. Across **Tayrona Maisons**, we translate that singularity into curated brands and experiences built on traceability, quality, and stewardship. Through **Global Financing & Development**, we advance our **Nation Building** directive through cultural preservation and the creation of lasting legacies and assets. Through **Tayrona Ventures**, we build enabling platforms and real-economy capabilities that strengthen execution and support long-horizon value creation. This work is anchored in governance, compliance, and responsible partnership.

TAYRONA MAISONS

A Portfolio of Curated Value

Tayrona Maisons is our portfolio of curated, vertically integrated luxury houses. Each Maison is anchored in a distinct origin, defined by rare resources, heritage craft, and local excellence. We then develop those origins into world-class products and experiences under clear standards of quality, traceability, and stewardship.

Our model differs from traditional brand groups. We invest across the value chain, from sourcing and production through brand building and distribution, while prioritizing responsible partnership and long-term value creation in the communities where we operate. Across the portfolio, we focus on disciplined execution, consistent governance, and a long-horizon approach to building enduring brands.

Below is a concise overview of the five Tayrona Maisons featured in this issue. Each summary highlights the origin, the offering, and how we bring it to market through our vertically integrated approach.

*In Every Creation, Excellence.
In Every Story, Impact*

QVINTO

Qvinto is our high jewellery Maison centered on Colombian emeralds. We focus on disciplined sourcing, careful selection, and craftsmanship standards designed to protect the integrity and provenance of each stone. Through a vertically integrated approach, we aim to control key steps from origin through finished piece, with an emphasis on traceability and responsible local engagement.

AMERIA RIVA

Ameria Riva is our premium textiles and haute couture Maison rooted in Andean heritage craft. The Maison brings together rare natural fibers, master artisan techniques, and modern design execution to produce premium textiles and couture pieces aligned with global luxury standards. Our operating model emphasizes traceable sourcing, consistent quality control, and direct partnership with local makers.

TAYRONA CACAO

Tayrona Cacao is our fine cacao and chocolate experience Maison anchored in Ecuadorian origin. We are building a platform that connects cultivation, processing, and brand experience with a focus on quality standards and transparent supply chains. The goal is to elevate Ecuadorian cacao through premium products and curated experiences, while supporting long-term local value creation.

RUDIS SYLVA

Rudis Sylva is our Swiss haute horlogerie Maison, built around precision engineering and independent watchmaking heritage. The brand is recognized for the Harmonious Oscillator movement, which is designed to instantly cancel out the effects of gravity when a watch is in a vertical position, whereas a classic tourbillon needs a full minute to compensate. We support its growth with a focus on disciplined execution, brand stewardship, and long-term value. Our approach remains centered on quality, rarity, and responsible expansion.

SAGANA

Sagana is our hospitality Maison focused on ultra-luxury stays and cultural travel experiences. We are building a new standard of service through an invitation-only guest program that is designed to anticipate needs before they are requested, with a consistent hospitality philosophy across the Sagana network. Each property is developed to reflect its location through architecture, service, and curated programming, supported by disciplined operational standards and long-horizon asset value.

Global Financing & Development: Global Solutions for Local Impact

Global Financing & Development is the Tayrona division dedicated to structuring, financing, and delivering socio-economic projects with a focus on long-term value creation. We work with governments, institutions, and qualified counterparties to align mandates and set clear governance and compliance standards. From there, we structure bankable transactions designed to support jobs, infrastructure, and sustainable growth.

To qualify as a Tayrona socio-economic initiative, each project must be anchored in a clear public purpose and a defined sponsor or counterparty, supported by documented governance and compliance standards. We prioritize initiatives that meet four outcome criteria:

- Generate tax revenue
- Boost employment
- Enhance industry growth
- Ensure long-term business sustainability

Our approach is designed to be institutional. We define the project scope and delivery pathway up front, complete structured diligence, and document roles, milestones, and reporting requirements so that each initiative can be executed with transparency and accountability. Where appropriate, we coordinate with third-party technical specialists, banking partners, and local operators. We apply risk controls that are consistent with responsible partnership and long-term stewardship.

PROJECT FINANCE PROGRAM

A structured approach to defined projects with clear budgets, milestones, and delivery timelines. In this model, the project developer contributes a portion of the project budget, and Tayrona supports the financing plan and coordination with eligible funding partners under documented governance, reporting, and risk controls. The objective is to support bankable projects that can generate long-term economic activity, employment, and measurable outcomes.

SOVEREIGN FINANCE PROGRAM

A pathway designed for sovereign-led initiatives where a partner nation provides an approved sovereign instrument, such as a government bond or guarantee, to support priority development programs. Tayrona works with partner banks and institutional counterparties to support structuring, documentation, and governance under defined terms, aligned to compliance and disclosure requirements. This pathway is typically used for large-scale national priorities such as housing, healthcare, and critical infrastructure.

JOINT VENTURE PROGRAM

A partnership framework where Tayrona and a qualified local counterparty align complementary contributions and define shared delivery accountability for a specific mandate. The structure is used where local participation is central and where roles, governance, milestones, and reporting can be documented clearly from the outset. The goal is aligned execution and long-horizon asset value, with clear roles, accountability, and responsible local engagement.

TAYRONA VENTURES

Building the Backbone for Vertical Integration

Tayrona Ventures is the group division that helps convert strategic ideas into operating platforms, with disciplined governance from concept through execution. It provides structure, technical coordination, and partnership frameworks that support our vertically integrated models by turning ideas and mandates into durable operating businesses.

In this context, a platform is a repeatable capability with defined partners, milestones, and controls. It is designed to become a durable operating business. We currently advance three platform areas across the group. Each platform is built to support disciplined execution, with structured diligence, defined milestones, and responsible partner selection from development through operations. Tayrona Ventures complements Tayrona Maisons, which leads curated brands and customer-facing execution, and Global Financing & Development, which structures and delivers institutional mandates under defined governance.

TAYRONA VENTURES

Origin Platforms: Platforms that establish and steward supply at the source, with traceability, quality control, and responsible local engagement.

- **Tayrona Emeralds:** Our mining and origin platform that supports Qvinto through disciplined sourcing and supply foundations.

Cultural Platforms: Platforms that develop cultural intellectual property, storytelling, and experiences that expand Tayrona's reach and reinforce long-horizon brand equity.

- **Tayrona Entertainment Group:** Our entertainment platform that supports film and media projects through development, production support, and strategic collaboration, bringing creative visions to audiences through trusted partners.

Industrial Platforms: Platforms that build real-economy capability across strategic materials and industrial value chains, with an emphasis on bankable execution and responsible development.

- **Tayrona MgO:** Our emerging Magnesium Oxide (MgO) initiative advancing construction materials applications while progressing work toward a long-term Canadian supply base.

Our Magnesium Oxide (MgO) Model

Tayrona MgO: Climate-Resilient Building Systems for High-Risk Environments

Globally, the construction industry is being tested by increasingly hazardous conditions. Wildfires, hurricanes, and high-wind events, inland flooding, coastal humidity, and repeated freeze-thaw cycles are pushing conventional building materials beyond what they were designed to endure. The result is a growing need for construction materials and building systems that can deliver higher durability, improved safety, and predictable performance in climate-exposed regions.

Tayrona MgO is focused on advancing next-generation construction materials built for these realities. Our efforts are focused on MgO boards and SIPs panels (Structural Insulated Panel Systems) as modern, high-performance components for faster and more resilient building envelopes. We are partnering with established leaders in MgO board and panel production and leveraging a dedicated research and development facility to further advance board formulation, system engineering, and performance under real-world conditions. Our objective is to support broader adoption of code-aligned, climate-resilient materials that can reduce lifecycle risk and improve speed and quality of deployment for housing and infrastructure.

Credibility and compliance are central to our approach. Our MgO boards have been scrutinized through independent, third-party evaluation processes and are supported by an ICC Evaluation Service (ICC-ES) Evaluation Report (ESR), including ESR-4642, which sets out evaluated properties and conditions of use under applicable building codes. This provides a clear pathway for builders, developers, and institutional stakeholders who require documented performance and code-recognized acceptance.

In parallel, Tayrona is progressing work toward securing a long-term Canadian MgO supply base as a cornerstone of our vertically integrated model. Canada's critical minerals and industrial materials potential remains underutilized, and we view this as an opportunity to connect upstream resource development with downstream manufacturing and deployment. This includes disciplined evaluation of a first mine opportunity, aligned permitting and community engagement, and a responsible pathway to produce MgO from source. The objective is to strengthen supply resilience for our own construction materials initiatives and, over time, support broader North American demand for MgO and magnesium-based components.

During our recent visit to Ecuador, we presented our MgO Industrialized Housing Program to government authorities and the presidential team. Following these meetings, we consolidated a government cooperation framework to position Ecuador as the primary hub for the development and deployment of MgO-based construction systems across South America. The program is designed to support the construction of hundreds to thousands of housing units through fast, durable, and cost-efficient MgO technology, with a focus on social housing, resilient housing, and urban development. By pairing government cooperation with Ecuador's growing role as a strategic industrial and logistical hub, this initiative is intended to scale beyond a single country and serve as a housing and infrastructure solution export platform for the region.

This step matters because our MgO strategy is not limited to materials. It is designed to deliver complete building solutions, including boards, structural insulated panel systems (SIPS), modular systems, and full housing solutions. As outlined in our MgO vertical integration blueprint, our approach is to control the full value chain, from mineral sourcing to advanced manufacturing and complete building systems, so we can deliver scalable housing and infrastructure solutions for governments and large developments with consistent performance and predictable deployment.

Nation Building in Action: Country Spotlights

Tayrona's work is grounded in a simple belief that when capital is aligned to the right mandate and executed with strong governance, it can help nations convert local advantage into lasting prosperity. Our mission as Singularity Curators is to be drawn to what is rare, culturally significant, and locally protected. Our goal as Nation Builders is to structure programs that translate those local strengths into durable economic outcomes.

Our socio-economic motive is practical and measurable. We prioritize initiatives that strengthen a country's tax base, expand employment, accelerate industry growth, and support long-term business sustainability. In each country partnership, we focus on bankable structures, credible delivery pathways, and transparent reporting so progress can be tracked over time.

In this edition, we highlight a selection of partner nations where our mandates reflect both opportunity and responsibility. Each spotlight below summarizes the strategic intent, the program pathways being evaluated, and the long-horizon outcomes we are working to support.

COLOMBIA

Responsible Emerald Supply and
Community-Centered Legacy Delivery

TRACEABILITY, TECHNOLOGY, AND MEASURABLE SOCIAL IMPACT

In Colombia, Tayrona's engagement is anchored in a vertically integrated emerald origin platform designed to connect responsible extraction with global, high-integrity market access. Through Tayrona Emeralds, we advance a technology-led mining model focused on disciplined process control, provenance, and quality assurance across the supply chain, delivering end-to-end control from the mine to the market. This origin platform supports our high jewellery Maison, Qvinto, which transforms Colombian emeralds into finished pieces through exceptional craftsmanship and strict standards of authenticity.

Our approach emphasizes modern operating practices and continuous technical improvement. As we advance our roadmap, we are evaluating upgrades such as laser sorting and other technology-led process enhancements intended to strengthen consistency, reinforce quality controls, and improve repeatability in a sector where precision is often underestimated. Across both Tayrona Emeralds and Qvinto, the objective is consistent: to protect the integrity of origin, elevate Colombian emeralds through world-class execution, and ensure that value creation is tied to stewardship.

Colombia is also where our Nation Building directive is expressed through concrete, community-serving initiatives. In partnership with local stakeholders, Tayrona Emeralds and Qvinto donated nearly eight hectares of land in Cumaral, Meta, supporting the creation of the Hospital of Peace, a landmark project designed as the first specialized medical center in Colombia and Latin America for victims of sexual violence in the context of the armed conflict. The project's architectural designs were officially presented on December 10, 2025 at the National University of Colombia, with Pritzker Prize-winning architect Alejandro Aravena leading the design vision for a facility intended to feel like a second home for victims and their families. The Hospital of Peace is being fully funded by Tayrona Capital through our joint ventures alongside Tayrona Emeralds and Qvinto.

Beyond healthcare, our commitment to equitable development includes direct support for families affected by conflict and displacement. Through our Colombia initiatives, we have supported land allocation to 32 families in Gachalá and the official allocation of land to 14 beneficiary families in Somondoco, Boyacá, reinforcing a practical model of local stability: secure homes, dignified livelihoods, and a durable base for reconciliation.

PERU

Ameria Riva and Ethical Haute Textile Stewardship

ANIMAL WELFARE, HERITAGE CRAFT, AND TRACEABLE LUXURY MATERIALS

In Peru, Tayrona's work is rooted in Andean heritage and guided by a modern standard of ethical sourcing that treats rare natural fibres as a national advantage to be protected, not exploited. Our focus is to help strengthen traceability, conservation-minded practices, and disciplined quality controls so Peru's most exceptional materials can reach global markets with integrity. Within Tayrona Maisons, Ameria Riva serves as the platform through which we translate that Peruvian excellence into couture-grade textiles and finished creations.

Our approach begins with a simple principle: these fibres are not commodities. Vicuña, alpaca, guanaco, and llama are part of a living Andean ecosystem and a cultural tradition that must be safeguarded. By operating in harmony with nature and respecting sustainable limits, we prioritize animal wellbeing and conservation while reinforcing the dignity of the artisans and local communities who protect these materials and carry the craft forward.

The objective is to restore meaning to luxury through provenance, restraint, and craft. Textiles are curated in limited quantities to preserve rarity and protect quality, with traceability standards designed to keep value creation aligned with stewardship. Through Ameria Riva, we connect Peruvian heritage to global haute couture expectations, while maintaining clear ethical discipline behind the material.

During our recent mission to Peru, we achieved significant progress in advancing Ameria Riva's vertical integration strategy for the rarest natural fibres in the world, including Vicuña, Guanaco, Royal Baby Alpaca, Suri Alpaca, and Black Alpaca. We expanded and secured additional fibre production and sourcing capacity, reaching levels intended to support textile manufacturing at a scale sufficient to supply a global boutique footprint, while maintaining strict control over quality, traceability, and exclusivity. This progress positions Ameria Riva not simply as a fashion brand, but as a fully integrated textile house operating from origin, reinforcing Peru's heritage fibres as a protected national advantage translated into high cultural capital.

Our model is designed around protection rather than extraction. We treat these animals as part of a fragile ecosystem that must be safeguarded through conservation-minded harvesting, animal welfare controls, and long-term habitat stewardship. By aligning scaled capability with ethical discipline, we aim to ensure that growth in Ameria Riva strengthens Andean communities, supports artisan livelihoods, and reinforces conservation outcomes, while building a traceable luxury materials platform rooted in Peru.

ECUADOR

A Nation of Biodiversity, Culture,
and Global Distinction

HOUSING, HEALTHCARE, INFRASTRUCTURE, AND ORIGIN-BASED VALUE CREATION

In Ecuador, our engagement is oriented toward large-scale socio-economic delivery with a focus on housing, healthcare capacity, and critical infrastructure. We are working with counterparties to define mandates, confirm delivery pathways, and align governance and compliance standards that can support institutional participation.

In partnership with local counterparties, we are structuring several program pathways to support priority project categories, including social housing, healthcare facilities, roads and other critical infrastructure, and select strategic developments. These pathways include Sovereign Finance for government-led initiatives, Project Finance for defined developments with clear budgets and milestones (including housing and healthcare delivery, as well as other qualifying infrastructure), and Joint Venture structures for assets where local contributions (such as land or operating capability) can be paired with structured capital and execution support. Where appropriate, strategic developments may also include destination-led hospitality assets and other qualifying infrastructure projects.

Ecuador's role as a world-class cacao origin is central to our long-horizon partnership. Through **Tayrona Cacao**, we have consolidated the essential foundations required to fully launch large-scale cacao operations in Manabí. Manabí is home to Ecuador's world-renowned Fine Aroma cacao (Arriba Nacional), which is recognized as one of the best cacao varieties in the world. This includes land consolidation, strategic agreements with local partners and producers, progress on permits and operational structure, and the definition of our production and processing strategy. This milestone positions Tayrona Cacao not simply as a cacao producer, but as a fully vertically integrated cacao and chocolate Maison, built to compete on quality, origin control, brand, and luxury positioning rather than volume, and designed to translate Ecuadorian origin into premium products and curated boutique experiences.

In parallel, our work in Ecuador includes hospitality projects designed to strengthen nation-brand visibility through responsible tourism and high-quality visitor experiences. This includes **Sagana Route of Cacao Hacienda**, an origin-led hospitality concept located in Manabí on our **Tayrona Cacao** plantation and connected to Ecuador's cacao legacy. **Sagana Nayra Galápagos** is our ultra-luxury, villa-only resort initiative in the Galápagos Islands. **Sagana Yana Kawsay** is a distinct destination initiative, anchored in a rainforest hotel complex.

We also achieved significant progress in the development of **Sagana Nayra Galápagos**, advancing permits and regulatory processes, land and development planning, and key technical and architectural work required for execution planning. These milestones move Sagana Nayra from concept and design into the formal development and execution phase, with sustainability and environmental requirements integrated into the development pathway. Over time, our objective is to connect these initiatives to broader socio-economic outcomes through job creation, skills development, and durable, well-governed assets aligned with Ecuador's culture and ecology.

CHAD

A Fertile Frontier for Sustainable,
Multi-Industry Delivery

OIL, AGRICULTURE, HEALTHCARE, AND MANUFACTURING DELIVERY PATHWAYS

In Chad, our engagement is oriented toward a multi-industry development mandate designed to convert the country's fertile agricultural base and strategic energy resources into durable, essential-commodity capacity. We are evaluating structured pathways across oil, agriculture, healthcare, and manufacturing, with an emphasis on clearly defined scopes, delivery sequencing, and measurable outcomes that can support long-horizon participation.

Execution is anchored in responsible partnership and institutional discipline. We work with counterparties to align mandates, confirm governance and compliance standards, and apply modern technology and ecological safeguards where relevant, so that projects can be implemented under documented work programs, clear milestones, and transparent reporting. The objective is to support employment and skills development while strengthening local value creation and resilient domestic supply chains.

Over time, this mandate is intended to leave durable capacity behind, including expanded access to essential services, stronger industrial capability, and sustainable wealth generation that serves local communities. By focusing on Chad's priority sectors and aligning delivery with bankability and stewardship, our aim is to contribute to a thriving financial future built on accountable development and long-term national resilience.

GABON

Responsible Resource Development and
Essential-Commodity Delivery

A PROJECT FINANCE PROGRAM ACROSS OIL, MINING, FORESTRY, AND AGRICULTURE

In Gabon, Tayrona Capital is advancing a multi-industry Project Finance Program designed to strengthen essential-commodity production while reinforcing long-horizon stewardship. The mandate spans oil, mining, forestry, and agriculture, with an execution approach grounded in modern technology, defined work programs, and clear governance and reporting.

Gabon's economy is anchored by petroleum, mining, forestry, and agriculture. Through this program, Tayrona is injecting capital intended to enhance oil extraction efficiency, support responsible development across key mineral resources, and strengthen forestry and agricultural value chains that supply both domestic needs and export markets. Priority crops include yams, taro, rice, and palm oil, supported by initiatives that aim to improve productivity and resilience.

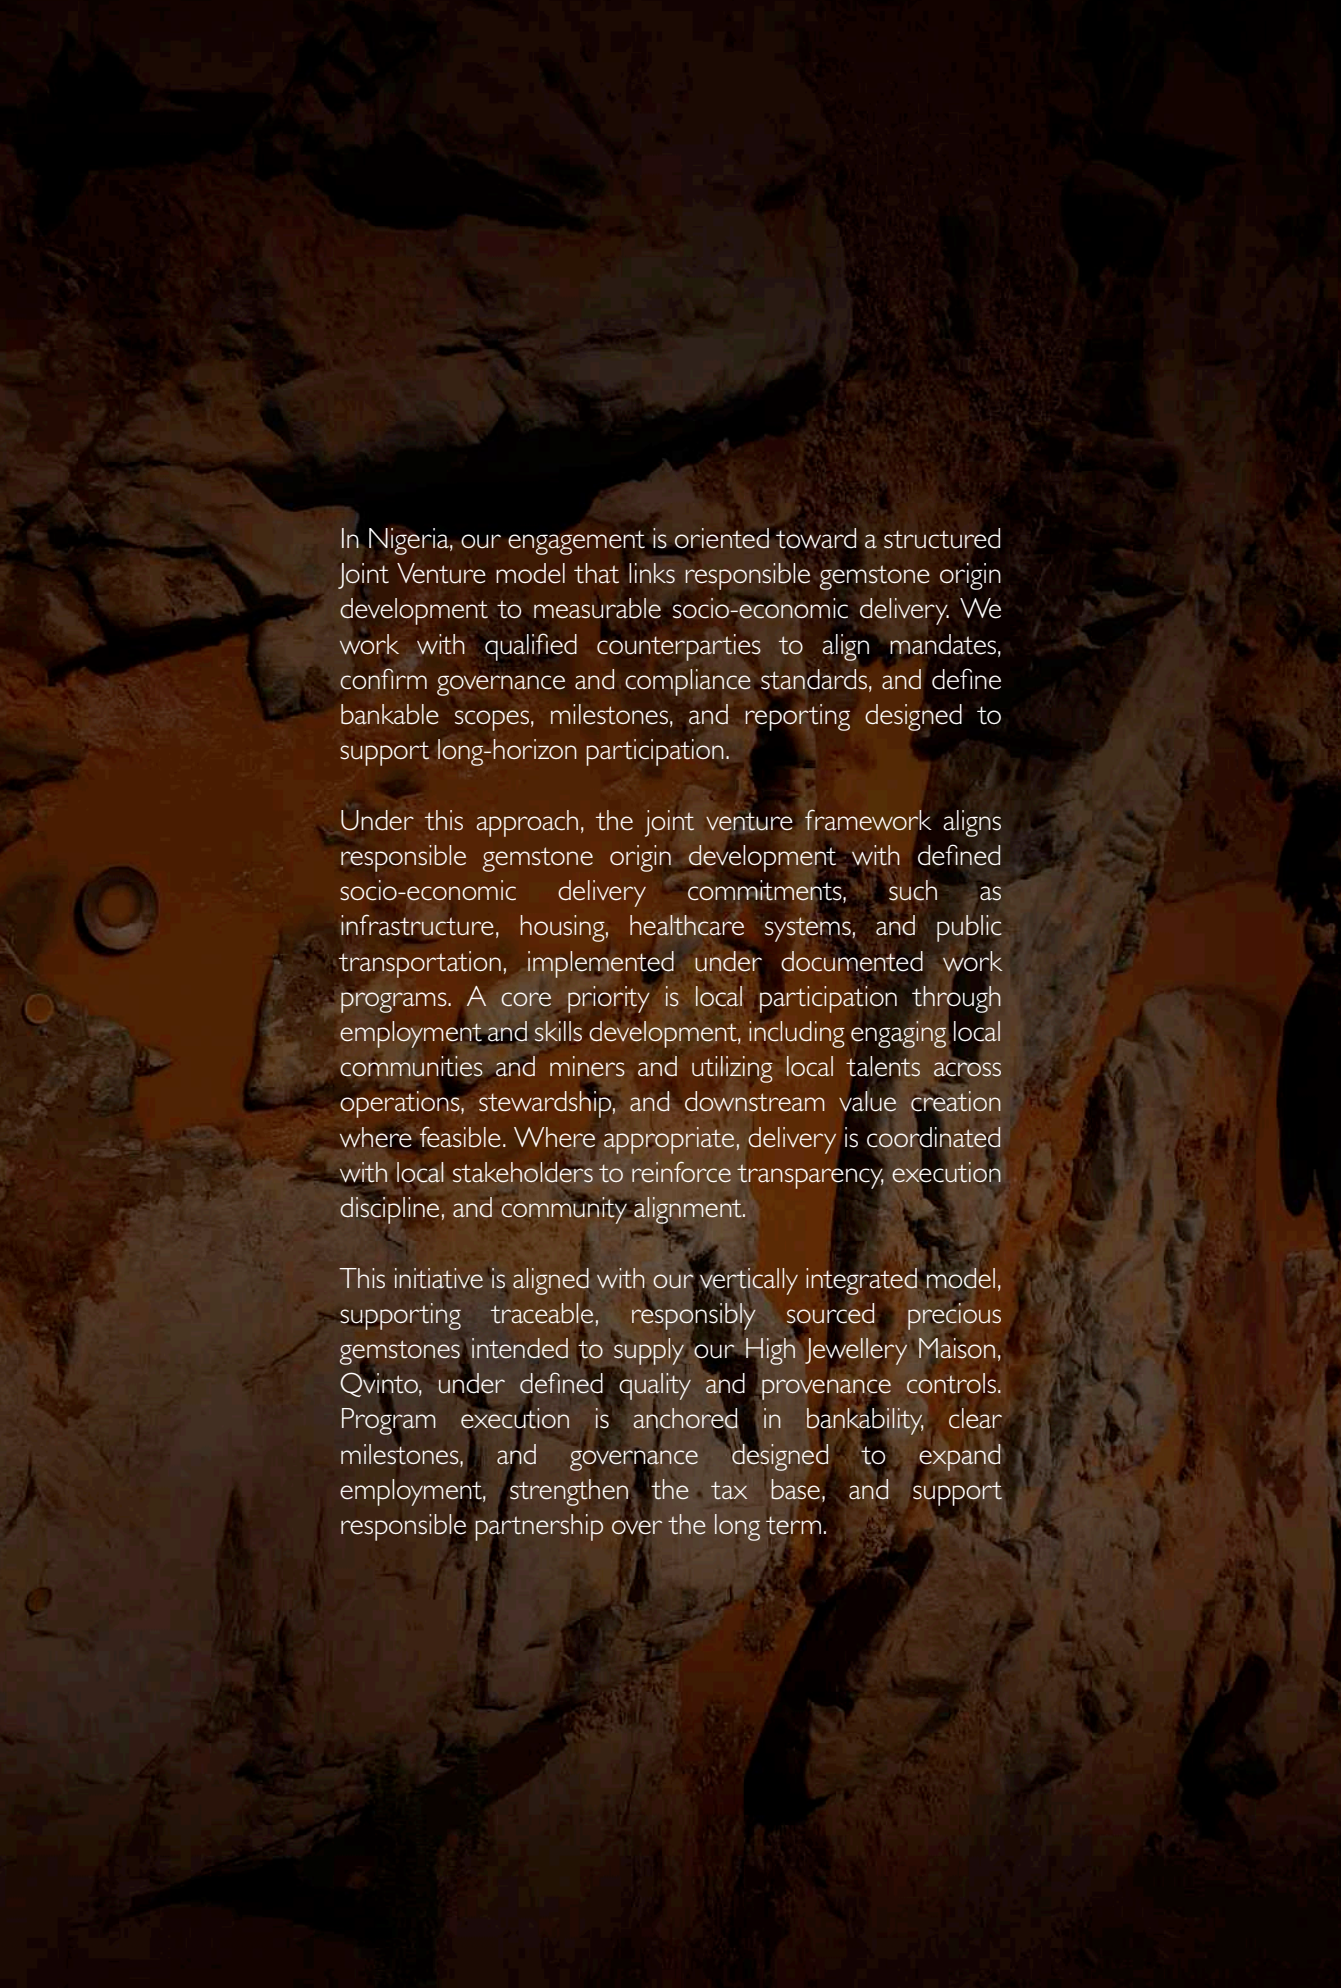

The objective is measurable socio-economic delivery: job creation, skills development, and durable operating capacity, implemented under strict ecological standards designed to protect Gabon's natural environment and reinforce local traditions. In parallel, the mandate includes strengthening healthcare infrastructure to expand access to quality medical services, supporting broader social welfare outcomes alongside economic growth.

NIGERIA

A Nation of Strategic Resources and
Nation Building Delivery

RESPONSIBLE ORIGIN, LOCAL VALUE CREATION, AND SCALABLE DEVELOPMENT PATHWAYS

In Nigeria, our engagement is oriented toward a structured Joint Venture model that links responsible gemstone origin development to measurable socio-economic delivery. We work with qualified counterparties to align mandates, confirm governance and compliance standards, and define bankable scopes, milestones, and reporting designed to support long-horizon participation.

Under this approach, the joint venture framework aligns responsible gemstone origin development with defined socio-economic delivery commitments, such as infrastructure, housing, healthcare systems, and public transportation, implemented under documented work programs. A core priority is local participation through employment and skills development, including engaging local communities and miners and utilizing local talents across operations, stewardship, and downstream value creation where feasible. Where appropriate, delivery is coordinated with local stakeholders to reinforce transparency, execution discipline, and community alignment.

This initiative is aligned with our vertically integrated model, supporting traceable, responsibly sourced precious gemstones intended to supply our High Jewellery Maison, Qvinto, under defined quality and provenance controls. Program execution is anchored in bankability, clear milestones, and governance designed to expand employment, strengthen the tax base, and support responsible partnership over the long term.

SOUTH AFRICA

A Strategic Mining Hub for
Nation Building Delivery

RESPONSIBLE GOLD AND CRITICAL MINERALS PRODUCTION,
PROCESSING, AND LOCAL VALUE CREATION

In South Africa, Tayrona Capital is advancing a Project Finance Program focused on responsible critical mineral mining and value-added processing. The objective is to support bankable development under defined scopes, modern operating standards, and clear governance and reporting designed to enable long-horizon participation.

Program execution emphasizes efficient, technology-led extraction and processing methods intended to improve productivity while reducing environmental impact. Where appropriate, operations apply low-complexity separation techniques and disciplined mine planning to manage operating costs, strengthen safety and compliance controls, and support responsible land and water stewardship.

Beyond production delivery, the program is designed to generate practical socio-economic outcomes through local employment, skills development, and engagement of qualified local suppliers. By pairing disciplined execution with responsible partnership, the mandate aims to strengthen regional economic activity and contribute to a durable operating footprint aligned with South Africa's long-standing mining capabilities.

CREDIBILITY IN THE OPEN:

Independent Coverage & the Tayrona Capital Media Library

Reader Guide: Independent Coverage & Official Sources

In a world where information moves fast and narratives can spread faster than facts, we believe the most durable credibility is the kind that is earned externally. This section helps readers orient themselves using independent, third-party references that mention Tayrona, our partners, or our initiatives, alongside clear direction to official Tayrona materials for context.

TAYRONA
CAPITAL FINANCIAL GROUP

MEDIA LIBRARY

Tayrona Capital Media Library is our central repository for the latest brochures, newsletters, videos, and a curated collection of external publications. Rather than embedding numerous links throughout each issue, we maintain this library as the single destination for current, approved materials and updates.

Media Library Access

Many readers first encountered the Tayrona name during earlier, more publicly visible chapters of our evolution, particularly through Tayrona Entertainment Group and the initial expansion of our hospitality footprint via Sagana. Those chapters naturally produced a stronger public-facing digital footprint, including articles, interviews, and media mentions that remain discoverable today. As a result, when you review third-party coverage, you may notice that several references cluster in earlier periods of activity. For readers looking for an independently verifiable reference connected to Tayrona Entertainment Group's early public footprint, James Ordonez's IMDb filmography is available here.

James Ordonez on IMDb

Over the past few years, we have kept a lower public profile in our communications. This is not because the platform has been inactive; rather, it reflects the nature and maturity of the work as we expanded into more institutional environments and government-level engagements. In these settings, progress is often governed by structured processes, regulated timelines, and confidentiality obligations (including NDAs and related restrictions) that limit what can be shared publicly until formal milestones are reached. These frameworks are standard in serious, long-horizon initiatives, and we regard them not as constraints but as markers of trust. We take these obligations seriously as part of responsible execution, governance, and long-horizon stewardship.

2026 Outlook: Bringing Tayrona Maisons to the World

As we progress through 2026, our focus becomes increasingly visible through the rollout of Tayrona Maisons, our portfolio of vertically integrated luxury houses. This next chapter is designed to be customer-facing by nature, with new brand stories, new experiences, and clearer touchpoints for the public to engage with the vision we are building. As official launches and campaigns scale, you should expect to see more frequent updates and broader coverage across our new brands.

Clarity in a Changing Search Landscape

In today's information environment, AI-powered search and summary tools can be incredibly useful, but they are not always precise. These systems often pull from fragmented online material, outdated pages, or low-quality sources, and they can inadvertently merge unrelated people, entities, or events that share similar names. When that happens, the output can look authoritative while still being wrong.

For that reason, we encourage readers to treat AI-generated summaries as a starting point, not as a substitute for primary sources. If you ever see a result that appears inconsistent with Tayrona's official communications, we recommend verifying it against our approved materials and, where appropriate, the original publisher or official public records.

To make verification simple, we centralize our current, approved information in the Tayrona Capital Media Library, including our latest brochures, newsletters, and a curated set of external references. This is the best place to confirm what is current, accurate, and representative of Tayrona's work today.

How we Suggest Verifying AI-Sourced Information

- **Cross-check names and entities carefully**, especially where AI tools may conflate unrelated people, organizations, or locations with similar naming patterns.
- **Use primary sources first** (official Tayrona materials, original publishers, official filings/records where applicable), and read the original context rather than relying on condensed summaries.
- **Prefer dated, attributable documents** (press releases, signed announcements, audited or formally issued materials), since AI results may surface outdated versions or incomplete excerpts.
- **If a matter involves an active legal process**, we address it through the appropriate channels and remain focused on documented facts and due process.

We remain extremely optimistic about the future and the growing visibility that will come with the rollout of **Tayrona Maisons**. As our brands launch and our customer-facing footprint expands, readers should expect clearer, more frequent official updates, along with a stronger and easier-to-verify public record. In parallel, we expect continued momentum across **Tayrona Ventures**, including the buildout of practical, real-economy platforms such as **Tayrona MgO**, as we advance modern construction materials and long-horizon supply initiatives.
